Intro to the Google Cloud Customer Care portfolio

The Customer Care portfolio

Every Google Cloud customer—including those on a free trial—gets Basic Support . This includes access to documentation , community forums , billing assistance , and Active Assist .

Features and services

Standard Support

Recommended for workloads under development, kickstart your cloud journey with unlimited access to tech support. Troubleshoot, test, and explore.

Learn more

Sign up

Enhanced Support

Designed for workloads in production, with fast response times and additional services to optimize your experience with high-quality, robust support.

Learn more

Sign up

Premium Support

Designed for enterprises with critical workloads, with the fastest response time, Customer Aware Support, and Technical and Accounts Manager Services.

Pricing

Minimum spend of \$29.00

- or -

3% of monthly Cloud charges.

Charges will be at least the minimum charge of \$29.00 or the result of the calculation, whichever is higher.

Estimate cost

Monthly support charges are calculated as a percentage of your total eligible Google Cloud, Looker, and Google Security Operations costs. This calculation is based on the list prices of all eligible services before the application of any discounts, credits, or other adjustments. For services covered by BigQuery reservations and resource-based Committed Use Discounts (CUDs), the support fee is calculated based on the list price of the commitment fee itself. Any usage that exceeds your commitment is calculated at the standard on-demand list price.

Minimum spend of \$100.00

- or -

10% of monthly Cloud charges for the first \$0 - \$10K

7% of monthly Cloud charges from \$10K - \$80K

5% of monthly Cloud charges from \$80K - \$250K

3% of monthly Cloud charges over \$250K

Charges will be at least the minimum charge of \$100.00 or the result of the calculation, whichever is higher.

Estimate cost

Monthly support charges are calculated as a percentage of your total eligible Google Cloud, Looker, and Google Security Operations costs. This calculation is based on the list prices of all eligible services before the application of any discounts, credits, or other adjustments. For services covered by BigQuery reservations and resource-based Committed Use Discounts (CUDs), the support fee is calculated based on the list price of the commitment fee itself. Any usage that exceeds your commitment is calculated at the standard on-demand list price.

Minimum spend of \$15,000.00

- or -

10% of monthly Cloud charges for the first \$0 - \$150K

7% of monthly Cloud charges from \$150K - \$500K

5% of monthly Cloud charges from \$500K - \$1M

3% of monthly Cloud charges over \$1M

Charges will be at least the minimum charge of \$15,000.00 or the result of the calculation, whichever is higher.

Estimate cost

Monthly support charges are calculated as a percentage of your total eligible Google Cloud, Looker, and Google Security Operations costs. This calculation is based on the list prices of all eligible services before the application of any discounts, credits, or other adjustments. For services covered by BigQuery reservations and resource-based Committed Use Discounts (CUDs), the support fee is calculated based on the list price of the commitment fee itself. Any usage that exceeds your commitment is calculated at the standard on-demand list price.

Premium Support

Contact sales

Visit our Managed Service Providers and learn about partner-led Premium Support.

Value-Add Services

Boost your capabilities in the cloud with Value-Add Services. Available as an additional purchase for Enhanced and Premium Support customers.

Technical Account Advisor Service

The Technical Account Advisor Service helps your business get the most out of your Google Cloud investment by providing enhanced oversight of your cloud experience, combining proactive guidance with regular service reviews and escalation support for issues critical to your business.

Exclusive to Enhanced Support customers.

Learn more

Planned Event Support

Your critical planned events are at the heart of your organization's strategy. Get system readiness for successful peaks. Start with an Architecture Essentials Review, then gain accelerated response time of just 15 mins for P1 issues during the event. And after, receive a performance summary report to review performance and improvement opportunities. Exclusive to Enhanced Support customers.

Learn more

Assured Support

When regulatory governance is paramount, Assured Support helps you to reach your compliance objectives while meeting operational demands for geographical locations and personnel conditions, including FedRAMP High, IL4, and CJIS .

Assured Support is available as an additional purchase for Premium Support and Enhanced Support customers (US, EU, Australia, Canada, and Israel).

[Learn more](#)

Mission Critical Services

Maximize reliability of your mission critical environments, where the consequences of service disruption can be catastrophic. Your environment goes through a journey to operate in Google's own production services standard. Get the fastest possible impact mitigation response, and drive outage prevention through continuous improvement.

Exclusive to Premium Support customers.

Key benefits

Why Google Cloud

Top reasons businesses choose us.

AI and Agents

Get enterprise-ready AI.

Multicloud

Run your apps wherever you need them.

Global infrastructure

Build on the same infrastructure as Google.

Data Cloud

Make smarter decisions with unified data.

Modern Infrastructure Cloud

Next generation of cloud infrastructure.

Security

Protect your users, data, and apps.

Productivity and collaboration

Connect your teams with AI-powered apps.

Reports and insights

Executive insights

Curated C-suite perspectives.

Analyst reports

Read what industry analysts say about us.

Startups and SMB

See all solutions

Industry Solutions

Reduce cost, increase operational agility, and capture new market opportunities.

Retail

Analytics and collaboration tools for the retail value chain.

Consumer Packaged Goods

Solutions for CPG digital transformation and brand growth.

Financial Services

Computing, data management, and analytics tools for financial services.

Healthcare and Life Sciences

Advance research at scale and empower healthcare innovation.

Media and Entertainment

Solutions for content production and distribution operations.

Telecommunications

Hybrid and multi-cloud services to deploy and monetize 5G.

Games

AI-driven solutions to build and scale games faster.

Manufacturing

Migration and AI tools to optimize the manufacturing value chain.

Supply Chain and Logistics

Enable sustainable, efficient, and resilient data-driven operations across supply chain and logistics operations.

Government

Data storage, AI, and analytics solutions for government agencies.

Education

Teaching tools to provide more engaging learning experiences.

Not seeing what you're looking for?

See all industry solutions

Application Modernization

Assess, plan, implement, and measure software practices and capabilities to modernize and simplify your organization's business application portfolios.

CAMP

Program that uses DORA to improve your software delivery capabilities.

Modernize Traditional Applications

Analyze, categorize, and get started with cloud migration on traditional workloads.

Migrate from PaaS: Cloud Foundry, Openshift

Tools for moving your existing containers into Google's managed container services.

Migrate from Mainframe

Automated tools and prescriptive guidance for moving your mainframe apps to the cloud.

Modernize Software Delivery

Software supply chain best practices - innerloop productivity, CI/CD and S3C.

DevOps Best Practices

Processes and resources for implementing DevOps in your org.

SRE Principles

Tools and resources for adopting SRE in your org.

Platform Engineering

Comprehensive suite of managed services and Golden Paths to build, manage, and scale IDPs.

Architect for Multicloud

Manage workloads across multiple clouds with a consistent platform.

Artificial Intelligence

Add intelligence and efficiency to your business with AI and machine learning.

Gemini Enterprise for Customer Experience

Build and manage agents that live across the entire customer lifecycle.

Gemini Enterprise

Unified agentic portfolio for your entire organization.

AI Commerce Search

Google-quality search and product recommendations for retailers.

Google Cloud with Gemini

AI assistants for application development, coding, and more.

Physical AI

Simulate, train, and operate the next generation of robots, autonomous vehicles, industrial devices, and machines.

APIs and Applications

Speed up the pace of innovation without coding, using APIs, apps, and automation.

New Business Channels Using APIs

Attract and empower an ecosystem of developers and partners.

Unlocking Legacy Applications Using APIs

Cloud services for extending and modernizing legacy apps.

Open Banking APIx

Simplify and accelerate secure delivery of open banking compliant APIs.

Data Analytics

Generate instant insights from data at any scale with a serverless, fully managed analytics platform that significantly simplifies analytics.

Data Migration

Migrate and modernize your data warehouse and data lakes with AI-powered migration services.

Data Lakehouse

Unify and govern your multimodal data with a high-performance and open data lakehouse.

Real-time Analytics

Insights from ingesting, processing, and analyzing event streams.

Marketing Analytics

Solutions for collecting, analyzing, and activating customer data.

Datasets

Data from Google, public, and commercial providers to enrich your analytics and AI initiatives.

Business Intelligence

Solutions for modernizing your BI stack and creating rich data experiences.

Data Analytics Agents

Built-in agents for data lifecycle and tools to build your own agents.

Geospatial Analytics

A comprehensive platform to solve for geospatial use cases at scale.

Data Science

Managed services and integrated workflows to build, manage, and scale data science.

Databases

Migrate and manage enterprise data with security, reliability, high availability, and fully managed data services.

Database Migration

Guides and tools to simplify your database migration life cycle.

Database Modernization

Upgrades to modernize your operational database infrastructure.

Databases for Games

Build global, live games with Google Cloud databases.

Google Cloud Databases

Database services to migrate, manage, and modernize data.

Migrate Oracle workloads to Google Cloud

Rehost, replatform, rewrite your Oracle workloads.

Open Source Databases

Fully managed open source databases with enterprise-grade support.

SQL Server on Google Cloud

Options for running SQL Server virtual machines on Google Cloud.

Gemini for Databases

Supercharge database development and management with AI.

Infrastructure

Migrate quickly with solutions for SAP, VMware, Windows, Oracle, and other workloads.

Application Migration

Discovery and analysis tools for moving to the cloud.

SAP on Google Cloud

Certifications for running SAP applications and SAP HANA.

High Performance Computing

Compute, storage, and networking options to support any workload.

Windows on Google Cloud

Tools and partners for running Windows workloads.

Data Center Migration

Migration solutions for VMs, apps, databases, and more.

Active Assist

Automatic cloud resource optimization and increased security.

Virtual Desktops

Remote work solutions for desktops and applications (VDI & DaaS).

Rapid Migration and Modernization Program

End-to-end migration program to simplify your path to the cloud.

Backup and Disaster Recovery

Ensure your business continuity needs are met.

Red Hat on Google Cloud

Google and Red Hat provide an enterprise-grade platform for traditional on-prem and custom applications.

Cross-Cloud Network

Simplify hybrid and multicloud networking, and secure your workloads, data, and users.

AI Infrastructure

Train, serve and operate your AI applications on the agent-native infrastructure powering Google.

Productivity and Collaboration

Change the way teams work with solutions designed for humans and built for impact.

Google Workspace

Collaboration and productivity tools for enterprises.

Google Workspace Essentials

Secure video meetings and modern collaboration for teams.

Cloud Identity

Unified platform for IT admins to manage user devices and apps.

Chrome Enterprise

ChromeOS, Chrome Browser, and Chrome devices built for business.

Security

Detect, investigate, and respond to online threats to help protect your business.

Agentic SOC

Delivering better security outcomes with AI agents.

Web App and API Protection

Threat and fraud protection for your web applications and APIs.

Security and Resilience Framework

Solutions for each phase of the security and resilience life cycle.

Risk and compliance as code (RCaC)

Solution to modernize your governance, risk, and compliance function with automation.

Software Supply Chain Security

Solution for improving end-to-end software supply chain security.

Security Foundation

Recommended products to help achieve a strong security posture.

Google Cloud Cybershield™

Strengthen nationwide cyber defense.

Startups and SMB

Accelerate startup and SMB growth with tailored solutions and programs.

Startup Program

Get financial, business, and technical support to take your startup to the next level.

Small and Medium Business

Explore solutions for web hosting, app development, AI, and analytics.

Software as a Service

Build better SaaS products, scale efficiently, and grow your business.

AI and Machine Learning

Gemini Enterprise Agent Platform

Unified platform for ML models, generative AI, and agent building.

Gemini Enterprise app

Secure platform to discover, create, run, and govern AI agents for employees.

Gemini Enterprise for Customer Experience

Build and manage agents that live across the entire customer lifecycle.

Model Garden

Single place to discover over 200 models from Google and Google partners.

Customer Experience Agent Studio

Build conversational AI with both deterministic and gen AI functionality.

Agent Search

Build Google-quality search for your enterprise apps and experiences.

Speech-to-Text

Speech recognition and transcription across 125 languages.

Text-to-Speech

Speech synthesis in 220+ voices and 40+ languages.

Translation AI

Language detection, translation, and glossary support.

Vision AI

Custom and pre-trained models to detect emotion, text, and more.

Contact Center as a Service

Omnichannel contact center solution that is native to the cloud.

Business Intelligence

Looker

Platform for BI, data applications, and embedded analytics.

Data Studio

Interactive data suite for dashboarding, reporting, and analytics.

Compute

Compute Engine

Virtual machines running in Google's data center.

App Engine

Serverless application platform for apps and back ends.

Cloud GPUs

GPUs for ML, scientific computing, and 3D visualization.

Migrate to Virtual Machines

Server and virtual machine migration to Compute Engine.

Spot VMs

Compute instances for batch jobs and fault-tolerant workloads.

Batch

Fully managed service for scheduling batch jobs.

Sole-Tenant Nodes

Dedicated hardware for compliance, licensing, and management.

Bare Metal

Infrastructure to run specialized workloads on Google Cloud.

Recommender

Usage recommendations for Google Cloud products and services.

VMware Engine

Fully managed, native VMware Cloud Foundation software stack.

Cloud Run

Fully managed environment for running containerized apps.

Containers

Google Kubernetes Engine

Managed environment for running containerized apps.

Cloud Run

Fully managed environment for running containerized apps.

Cloud Build

Solution for running build steps in a Docker container.

Artifact Registry

Package manager for build artifacts and dependencies.

Cloud Code

IDE support to write, run, and debug Kubernetes applications.

Cloud Deploy

Fully managed continuous delivery to GKE and Cloud Run.

Migrate to Containers

Components for migrating VMs into system containers on GKE.

Deep Learning Containers

Containers with data science frameworks, libraries, and tools.

Knative

Components to create Kubernetes-native cloud-based software.

Data Analytics

BigQuery

Autonomous data to AI platform for analytics and data science.

Managed Service for Apache Spark

Zero-ops serverless or managed clusters, accelerated by Lightning Engine.

Dataflow

Real-time analytics for stream and batch processing.

Looker

Platform for BI, data applications, and embedded analytics.

Lakehouse

Open lakehouse platform with enterprise storage and performance capabilities.

Pub/Sub

Messaging service for event ingestion and delivery.

Managed Service for Apache Airflow

Workflow orchestration service built on Apache Airflow.

Knowledge Catalog

Always-on catalog for AI that provides universal context for agents.

Data Analytics Agents

Built-in agents for data lifecycle and tools to build your own agents.

Data Analytics Migration Services

Free-to-use, cloud-native and AI-powered data migration services.

Managed Service for Apache Kafka

Managed Kafka service to operate highly available Apache Kafka clusters.

Not seeing what you're looking for?

See all data analytics products

Databases

AlloyDB for PostgreSQL

Fully managed, PostgreSQL-compatible database for enterprise workloads.

Cloud SQL

Fully managed database for MySQL, PostgreSQL, and SQL Server.

Firestore

Highly scalable and serverless NoSQL document database, with MongoDB compatibility.

Spanner

Cloud-native relational database with unlimited scale and 99.999% availability.

Bigtable

Cloud-native wide-column database for large-scale, low-latency workloads.

Datastream

Serverless change data capture and replication service.

Database Migration Service

Serverless, minimal downtime migrations to Cloud SQL.

Bare Metal Solution

Fully managed infrastructure for your Oracle workloads.

Memorystore

Fully managed Redis and Memcached for sub-millisecond data access.

Developer Tools

Artifact Registry

Universal package manager for build artifacts and dependencies.

Cloud Code

IDE support to write, run, and debug Kubernetes applications.

Cloud Build

Continuous integration and continuous delivery platform.

Cloud Deploy

Fully managed continuous delivery to GKE and Cloud Run.

Cloud Deployment Manager

Service for creating and managing Google Cloud resources.

Cloud SDK

Command-line tools and libraries for Google Cloud.

Cloud Scheduler

Cron job scheduler for task automation and management.

Cloud Source Repositories

Private Git repository to store, manage, and track code.

Infrastructure Manager

Automate infrastructure management with Terraform.

Cloud Workstations

Managed and secure development environments in the cloud.

Gemini Code Assist

AI-powered assistant available across Google Cloud and your IDE.

Not seeing what you're looking for?

See all developer tools

Distributed Cloud

Google Distributed Cloud Connected

Distributed cloud services for edge workloads.

Google Distributed Cloud Air-gapped

Distributed cloud for air-gapped workloads.

Hybrid and Multicloud

Google Kubernetes Engine

Managed environment for running containerized apps.

Apigee API Management

API management, development, and security platform.

Migrate to Containers

Tool to move workloads and existing applications to GKE.

Cloud Build

Service for executing builds on Google Cloud infrastructure.

Observability

Monitoring, logging, and application performance suite.

Cloud Service Mesh

Fully managed service mesh based on Envoy and Istio.

Google Distributed Cloud

Fully managed solutions for the edge and data centers.

Industry Specific

Anti Money Laundering AI

Detect suspicious, potential money laundering activity with AI.

Cloud Healthcare API

Solution for bridging existing care systems and apps on Google Cloud.

Device Connect for Fitbit

Gain a 360-degree patient view with connected Fitbit data on Google Cloud.

Telecom Network Automation

Ready to use cloud-native automation for telecom networks.

Telecom Data Fabric

Telecom data management and analytics with an automated approach.

Telecom Subscriber Insights

Ingests data to improve subscriber acquisition and retention.

Spectrum Access System (SAS)

Controls fundamental access to the Citizens Broadband Radio Service (CBRS).

Integration Services

Application Integration

Connect to 3rd party apps and enable data consistency without code.

Workflows

Workflow orchestration for serverless products and API services.

Apigee API Management

Manage the full life cycle of APIs anywhere with visibility and control.

Cloud Tasks

Task management service for asynchronous task execution.

Cloud Scheduler

Cron job scheduler for task automation and management.

Managed Service for Apache Spark

Zero-ops serverless or managed clusters, accelerated by Lightning Engine.

Cloud Data Fusion

Data integration for building and managing data pipelines.

Managed Service for Apache Airflow

Workflow orchestration service built on Apache Airflow.

Pub/Sub

Messaging service for event ingestion and delivery.

Eventarc

Build an event-driven architecture that can connect any service.

Management Tools

Cloud Shell

Interactive shell environment with a built-in command line.

Cloud console

Web-based interface for managing and monitoring cloud apps.

Cloud Endpoints

Deployment and development management for APIs on Google Cloud.

Cloud IAM

Permissions management system for Google Cloud resources.

Cloud APIs

Programmatic interfaces for Google Cloud services.

Service Catalog

Service catalog for admins managing internal enterprise solutions.

Cost Management

Tools for monitoring, controlling, and optimizing your costs.

Observability

Monitoring, logging, and application performance suite.

Carbon Footprint

Dashboard to view and export Google Cloud carbon emissions reports.

Config Connector

Kubernetes add-on for managing Google Cloud resources.

Active Assist

Tools for easily managing performance, security, and cost.

Not seeing what you're looking for?

See all management tools

Maps and Geospatial

Earth Engine

Geospatial platform for Earth observation data and analysis.

Google Maps Platform

Create immersive location experiences and improve business operations.

Media Services

Cloud CDN

Content delivery network for serving web and video content.

Live Stream API

Service to convert live video and package for streaming.

OpenCue

Open source render manager for visual effects and animation.

Transcoder API

Convert video files and package them for optimized delivery.

Video Stitcher API

Service for dynamic or server side ad insertion.

Migration

Migration Center

Unified platform for migrating and modernizing with Google Cloud.

Application Migration

App migration to the cloud for low-cost refresh cycles.

Migrate to Virtual Machines

Components for migrating VMs and physical servers to Compute Engine.

Cloud Foundation Toolkit

Reference templates for Deployment Manager and Terraform.

Database Migration Service

Serverless, minimal downtime migrations to Cloud SQL.

Migrate to Containers

Components for migrating VMs into system containers on GKE.

Data Analytics Migration Services

Streamlined data warehouse and data lake migration tooling and incentives.

Rapid Migration and Modernization Program

End-to-end migration program to simplify your path to the cloud.

Transfer Appliance

Storage server for moving large volumes of data to Google Cloud.

Storage Transfer Service

Data transfers from online and on-premises sources to Cloud Storage.

VMware Engine

Migrate and run your VMware workloads natively on Google Cloud.

Networking

Cloud Armor

Security policies and defense against web and DDoS attacks.

Cloud CDN and Media CDN

Content delivery network for serving web and video content.

Cloud DNS

Domain name system for reliable and low-latency name lookups.

Cloud Load Balancing

Service for distributing traffic across applications and regions.

Cloud NAT

NAT service for giving private instances internet access.

Cloud Connectivity

Connectivity options for VPN, peering, and enterprise needs.

Network Connectivity Center

Connectivity management to help simplify and scale networks.

Network Intelligence Center

Network monitoring, verification, and optimization platform.

Network Service Tiers

Cloud network options based on performance, availability, and cost.

Virtual Private Cloud

Single VPC for an entire organization, isolated within projects.

Private Service Connect

Secure connection between your VPC and services.

Not seeing what you're looking for?

See all networking products

Operations

Cloud Logging

Google Cloud audit, platform, and application logs management.

Cloud Monitoring

Infrastructure and application health with rich metrics.

Error Reporting

Application error identification and analysis.

Managed Service for Prometheus

Fully-managed Prometheus on Google Cloud.

Cloud Trace

Tracing system collecting latency data from applications.

Cloud Profiler

CPU and heap profiler for analyzing application performance.

Cloud Quotas

Manage quotas for all Google Cloud services.

Productivity and Collaboration

AppSheet

No-code development platform to build and extend applications.

AppSheet Automation

Build automations and applications on a unified platform.

Gemini Enterprise app

Secure platform to discover, create, run, and govern AI agents for employees.

Google Workspace

Collaboration and productivity tools for individuals and organizations.

Google Workspace Essentials

Secure video meetings and modern collaboration for teams.

Cloud Identity

Unified platform for IT admins to manage user devices and apps.

Chrome Enterprise

ChromeOS, Chrome browser, and Chrome devices built for business.

Security and Identity

Cloud IAM

Permissions management system for Google Cloud resources.

Sensitive Data Protection

Discover, classify, and protect your valuable data assets.

Mandiant Managed Defense

Find and eliminate threats with confidence 24x7.

Google Threat Intelligence

Know who's targeting you.

Security Command Center

Platform for defending against threats to your Google Cloud assets.

Cloud Key Management

Manage encryption keys on Google Cloud.

Mandiant Incident Response

Minimize the impact of a breach.

Chrome Enterprise Premium

Get secure enterprise browsing with extensive endpoint visibility.

Assured Workloads

Compliance and security controls for sensitive workloads.

Google Security Operations

Detect, investigate, and respond to cyber threats.

Mandiant Consulting

Get expert guidance before, during, and after an incident.

Not seeing what you're looking for?

See all security and identity products

Serverless

Cloud Run

Fully managed environment for running containerized apps.

Cloud Functions

Platform for creating functions that respond to cloud events.

App Engine

Serverless application platform for apps and back ends.

Workflows

Workflow orchestration for serverless products and API services.

API Gateway

Develop, deploy, secure, and manage APIs with a fully managed gateway.

Storage

Cloud Storage

Object storage that's secure, durable, and scalable.

Block Storage

High-performance storage for AI, analytics, databases, and enterprise applications.

Filestore

File storage that is highly scalable and secure.

Persistent Disk

Block storage for virtual machine instances running on Google Cloud.

Cloud Storage for Firebase

Object storage for storing and serving user-generated content.

Local SSD

Block storage that is locally attached for high-performance needs.

Storage Transfer Service

Data transfers from online and on-premises sources to Cloud Storage.

Google Cloud Managed Lustre

High performance managed parallel file service.

Google Cloud NetApp Volumes

File storage service for NFS, SMB, and multi-protocol environments.

Backup and DR Service

Service for centralized, application-consistent data protection.

Web3

Blockchain Node Engine

Fully managed node hosting for developing on the blockchain.

Blockchain RPC

Enterprise-grade RPC for building on the blockchain.
